

Internships in the Pharmaceutical Industry

Who we are:

Merck is a leading science and technology company in healthcare, life science and performance materials. Around 54,000 employees in 66 countries work to further develop technologies that improve and enhance life – from biopharmaceutical therapies to medical devices that support people living with chronic diseases. Merck is in charge of the development of many medical devices for the delivery of drugs.

We regularly recruit students for internships at all levels (bachelor, master..) in the following fields : Chemistry, biology, pharmaceutical, biotechnology, digital, engineering...

Here are some examples of internships you can find at Merck in Switzerland:

- Regulatory Compliance
- Digital transformation
- Quality Contrôle
- Quality Analyse
- Machine Learning
- Microbiology
- Project Management
- Packaging
- Supply Support Production
- Operational Excellence
- Process Improvement
- Dashboarding and Data Management

What we offer:

Merck's portfolio extends from liquid crystals for displays and pigments for automotive coatings to cancer treatments; this offers a lot of possibilities to develop in our growing company. As a stock-listed company we still make history – especially because we take responsibility for our employees, our products, the environment and the society we live in. We offer a modern and international working environment to unleash your innovative potential.

Ready to take on this challenge? Use the link above and send your complete application via our online platform. We are looking forward to meeting you soon!

Please note that only candidates currently undertaking their studies are eligible for an intern position. An Internship Agreement will have to be issued by your school. Only applicants fulfilling this criterion will be considered.
